## Data Management

- SAP Data Archiving
- SAP DaRT
- Data Quality & Governance
- Data Migration
- System Decommissioning
- Data Privacy

## Solution implementation

- S/4HANA Implementation
- SAP Business Data Cloud (BDC)
- SAP BTP Deployment
- SAP OpenText
  - Extended ECM
  - Vendor Invoice Management
  - Doc Presentment
- SAP Ariba
- SAP Vistex
- SAP Vertex
- AI Implementation
- Cloud Migrations

## Product & Innovations

- Data ASSIST by Auritas  
*(Data Archiving Automation)*
- Data GUARD by Auritas  
*(Legacy Decommissioning)*
- Auritas Intelligent Accrual  
*(Financial Automation)*

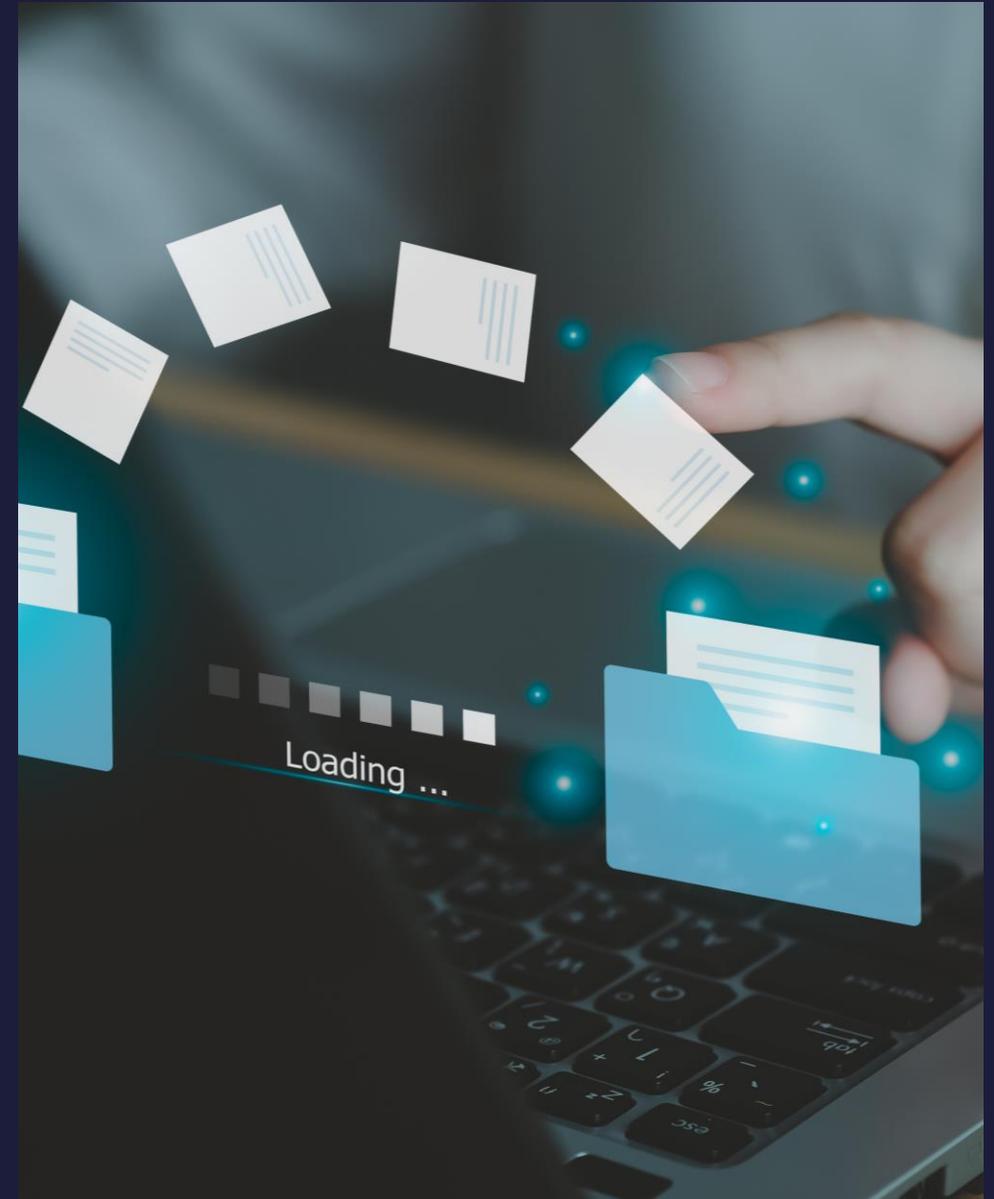

## Strategic Partnerships

- SAP Gold Partner
- SAP PartnerEdge, Sell
- CCFlex – Cloud Choice Flex

# Reasons to Move to Integration Suite

- SAP PI/PO mainstream support ends in 2027.
- SAP Integration Suite is a more modern solution for enterprises.
- Allows streamlined connection cloud to on-prem, SAP to non-SAP, within SAP BTP.

# Moving From PI/PO to Integration Suite

## Enhanced Capabilities and Features

SAP Integration Suite enhances data processing, automates integration flows, and adapts to your workflows—delivering greater speed, efficiency, and agility than traditional PI/PO tools.

## Modern and Scalable Architecture

Built on modern architecture, SAP Integration Suite scales effortlessly and adapts to your evolving business needs. Grows with your business without performance loss.

## Improved User Experience & Interface

An intuitive interface simplifies complex tasks, enhances user experience, and boosts productivity. It allows users to manage integration tasks more efficiently, leading to better workflow.

## Integration with Cloud & Hybrid Landscapes

Enables end-to-end process integration across various applications by facilitating message exchanges. This capability allows for the development and utilization of predefined integration content.

# Unify Your Tech Stack: Integration Suite

- Seamless Integration with Cloud Solutions
  - Streamlined connectivity between various cloud services, improving operational efficiency.
  - Scalability and cost-effectiveness through seamless integration.
  - Enhanced flexibility, allowing organizations to adapt quickly to changing needs.
- Advanced Security and Compliance Measures
  - Features ensure the integrity of data across all systems, safeguarding against unauthorized alterations.
  - Adheres to industry standards for data protection, ensuring compliance.
  - Advanced security features to prevent breaches that can lead to significant consequences.
- Comprehensive Monitoring and Analytics
  - Robust monitoring tools for critical insights into their integration processes.
  - Leverage real-time data to optimize processes and outcomes.

# Auritas' Expertise in Integration Suite

With Auritas, we help from deployment to post-live support, ensuring no more juggling disconnected systems.

## **Solution deployment on SAP BTP**

Auritas has successfully transitioned numerous organizations to the Integration Suite and have strong expertise in BTP.

## **Migration from legacy systems**

Decades of experience working with data migration. Certified team members that work with SAP and non-SAP legacy systems.

## **Integration with multiple ERP solutions**

Certified professionals who possess deep knowledge of Integration Suite and a number of SAP & non-SAP environments for connection.

## **Tailored solutions & support**

We provide personalized support throughout the implementation process and partner for long-term success post-implementation.

# Safe Implementation with Auritas

- Robust security protocols for data protection, regulatory compliance and risk mitigation.
- Tailored strategies to proactively identify potential risks and minimize disruption.
- Post implementation support for smooth operations.
- Expert guidance.

# Integration Suite – Use Cases

## Application Integration

Synchronize data across systems, such as integrating SAP S/4HANA with Salesforce to streamline quote-to-cash, or syncing SuccessFactors with ERP for aligned HR and finance data.

## API Management

Expose, manage, and secure APIs to enable innovation and accelerate digital transformation, such as creating APIs for customer data to fuel mobile development or partner collaboration.

## Finance Automation

Automate invoice approvals and journal postings by integrating your SAP ERP with OpenText VIM and external payment platforms.

## Hybrid Cloud Integration

Bridge cloud and on-premise environments by connecting SAP ECC or S/4HANA with cloud-based apps to support end-to-end business processes across hybrid IT landscapes.

## Sales & CRM

Connect Salesforce with SAP master and transactional data to give your sales team instant access to inventory, pricing, and order status.

## Accelerate Procurement

Streamline purchase requisitions and PO workflows by syncing SAP Ariba with S/4HANA and third-party vendor systems in real time.

**Thank you.**
