

Data ASSIST by Auritas brings a comprehensive, real-time data analysis framework allowing for visual insights and ROI projects. With the implementation of automated scheduling, you can ensure an error-free, less complex archiving process and maintain your data rightsized after your archiving project. It optimizes your SAP data volume management by automating archiving, while simplifying the identification and archiving of legacy or non-essential data.

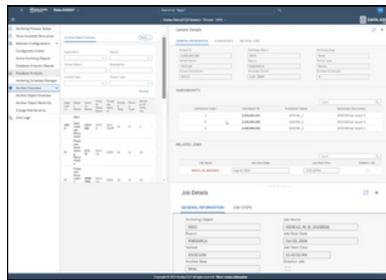

Visual analysis & projections

Visual Analysis, Insights and ROI Projections

Analyze your data using customizable visual charts, allowing to perform "what-if" analysis to help identify which items to archive for optimal ROI.

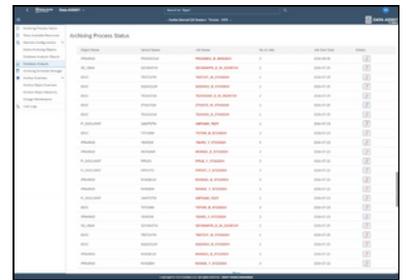

Automation for accuracy

Automate Scheduling, Eliminate Manual Errors

Eliminate the need for manual intervention, and avoid the risks associated with employee turnover, forgetfulness, or human error.

Streamlined management

Manage All Job Schedules from One Screen

Save time by managing, configuring, and maintaining job schedules from a single, centralized screen.

Automated scheduling

Helps avoid human error leading to cost savings and accurate DB reporting.

Data health monitoring

Real-time view into DB size reduction and performance improvements.

Intuitive data insights

Quick understanding of the scope & impact of data management activities.

Improved communication

Visual reports allow sharing with stakeholders the value of archiving.

Automated scheduling

Helps avoid human error leading to cost savings and accurate DB reporting.

Customizable dashboards

Visual analysis dashboards focused on your key metrics and business needs.
