

DMS+ by Auritas Use Cases

Industry: Manufacturing

Use Case Built for:

Background:

- Already had BTP DMS solution
- Needed a document management solution that handled data archive files and SAP documents
 - DMS does not support archive files it as of October 2025
- Implemented DMS+ by Auritas solution

Results and ROI:

- Storage of archive files on BTM DMS with DMS+
- Integration with SAP and SAP Commerce
- AI capabilities to search and summarize files on BTP storage

Industry: Construction

Use Case Built for:

Background:

- New S/4HANA implementation
- Looking for shutting their legacy content mgmt. solution and inhouse solution
- Needed to improve performance and speed of document retrieval
- Looking for a solution that addresses all requirements of content management for SAP and SuccessFactors.
- DMS+ by Auritas implementation

Results and ROI:

- Standardized & centralized processes
- Higher accuracy on business transactions.
- Increased planning & forecasting capability
- centralized content management tool

Industry: Utilities

Use Case Built for:

Background:

- Looking to replace Filenet content management platform
- Needed a tool that is built on cloud architecture
- DMS+ offered a serverless architecture and was highly scalable

Expected Results:

- Management of all customer bills on centralized platform
- Single platform for all media content
- Manage archive archive files with DMS+
