Auritas 2026 Brochure

Driving Innovation, Empowering Transformation.

About **Auritas**

Auritas is a global ERP products and services company specializing in ERP deployments, data management, process optimization, and product innovation. As an SAP Cloud Choice Flex Partner, the company has established itself as a leading pioneer in the rapid deployment of transformation engagements spanning the full suite of SAP solutions.

The company has successfully achieved over a billion in accumulated customer savings due to its expertise and experience in maximizing IT investments. With strong partnerships including SAP Gold and Cloud Choice Flex Partner, OpenText, Google Cloud Platform, AWS, Microsoft Azure, and Vertex, Auritas consistently delivers measurable ROI across leading industry verticals.

Data Management

- Data Archiving & ILM
- Retention Management
- HANA Memory Optimization (NSE)
- Data Governance
- Data Migration
- Cloud Migrations
- Data Privacy and Security
- Legacy Decommissioning
- Data Volume Assessment
- Data Quality Assessment

Solution Implementation

- SAP S/4HANA & RISE
- SAP BTP Deployment
  - SAP Integration Suite
- AI Implementation
- SAP OpenText
  - Extended ECM (xECM)
  - Vendor Invoice Management
  - Document Presentment
- SAP Ariba
- SAP Vertex
- SAP Vistex
- Geospatial Intelligence (GIS)

Product & Innovations

- Data ASSIST by Auritas
  (Data Archiving Automation)
- Data GUARD by Auritas
  (Legacy Decommissioning)
- Auritas Intelligent Accrual
  (Finance Automation)
- DMS+
  (Enhanced Document Storage)

AuriCare

(AMS + Hypercare)

Product Suite by Auritas

Auritas

Data Suite

Data ASSIST

Data ASSIST by Auritas optimizes SAP data volume management by automating data archiving and simplifying the identification and archiving of non-essential data.

Benefits:

- Visual, Real-Time Analysis
- ROI Projections
- Automated Scheduling
- Eradicate Manual Errors
- Centralize Management
- Customizable Dashboards

Data GUARD

Data GUARD by Auritas decommissions legacy SAP and non-SAP systems while retaining accessibility to the data & documents and ensuring reporting capability.

Benefits:

- Access to Legacy Data
- Retention Policy Control
- Multiple-System Retirement
- Increased Visibility
- Run Tailored Reports
- Streamlined IT Landscape

Process Suite

Intelligent Accrual™

A value extension for SAP customers running OpenText VIM, Auritas Intelligent Accrual automates financial accruals processes reducing its duration by 80% .

Benefits:

- Automated Financial Closing
- Auditing Compliance
- Time Reduction by 80%
- Tailored Rules
- Real-time Expend Recognition
- Multi-Criteria Rule-Based Accruals

Content Suite

DMS+ by Auritas

DMS+ is an advanced content management solution built to overcome the limitations of standard SAP BTP DMS and elevate it to enterprise-grade performance.

Benefits:

- AI-driven analysis
- Contextual search
- Metadata synchronization
- Cross-system integration
- Save annotations & notes
- Assure compliance

Data ASSIST by Auritas

Data ASSIST helps organizations efficiently optimize their SAP data volume management by automating the data archiving process. It simplifies identifying and archiving redundant or non-essential data, reducing database size, lowering storage costs, and improving overall SAP efficiency. With Auritas solutions for SAP BTP, organizations running SAP on either HANA or non-HANA platforms can address all their SAP document and data management requirements for storing and viewing information seamlessly.

Objectives

- Control SAP database size and growth of on-premise & cloud systems.
- Automate the archiving process. Keep the SAP database sizes in check.
- Gain visual analysis of your data management practices.
- Manage all job schedules from one screen.

Data ASSIST by Auritas

- **Visual Analysis, Insights and ROI Projections:** Analyze your data using customizable visual charts and graphs, allowing you to perform "what-if" analysis to help identify which items to archive for optimal ROI and performance improvements.
- **Automate Scheduling, Eliminate Manual Errors:** Eliminate the need for manual intervention, and avoid the risks associated with employee turnover, forgetfulness, or human error.
- **Manage All Job Schedules from One Screen:** Save time by managing, configuring, and maintaining job schedules from a single, centralized screen.

Data GUARD by Auritas

Data GUARD by Auritas facilitate organizations to decommission legacy SAP and non-SAP systems while retaining accessibility to the data for regulatory, legal, and business purposes. Ensure reporting capability on data and documents retired and stored in Data GUARD. Decrease the total cost of ownership of your legacy hardware while maintaining access to and preserving necessary data.

Objectives

- **Single View:** Provides a single view for managing & retiring SAP and non-SAP legacy systems.
- **Reporting on Legacy Systems:** Build customized report with the data, document, tables and all the information decommissioned.
- **Access Historical Data**: Run advanced tailored reports on decommissioned data and have a single source of truth.

Data GUARD by Auritas

- Provides a single view for managing & retiring multiple legacy SAP and non-SAP systems within an enterprise, creating a single source of truth.
- Data GUARD's capabilities for reporting on the data, documents, and tables stored in the tool allow for organizations to get access and insights into all the information decommissioned systems.
- Improved visibility & tracking of extraction, transformation, & loading processes.
- Maintain access & run advanced tailored reports for your decommissioned structured and unstructured data.

Data GUARD

Auritas Intelligent Accrual

With a focus on enhancing productivity and efficiency, Auritas Intelligent Accrual™ is a value extension for SAP customers running OpenText Vendor Invoice Management (VIM). The engine is designed to assist users in automating the financial close process for inflight invoices helping reduce the duration of the process by 80% while ensuring compliance with all known auditing requirements (GAAP, SOX). AI Accual significantly enhances accuracy in financial reporting, reduces the risk of non-compliance, and facilitates a streamlined audit process, effectively preparing the financial team for upcoming audit engagements.

Capabilities

- Automate financial close process for inflight invoices within VIM;
- Cater to global, local and industry-specific accounting rules;
- Accrual account determination by category (expenses, tax, freight);
- Flexibility in accrual postings;
- Accrual posting procedures and accrual reporting;
- Auto accrual and reversals based on accrual calendars.

Auritas Intelligent Accrual

- Instantaneous insights into the current financial state, fostering better decision-making.
- Mitigates the risk of inaccuracies in financial reporting with a meticulous approach that ensures a nuanced and highly accurate accrual process.
- Manual labor is significantly reduced, potential errors are minimized, and the overall closing timeline experiences an acceleration of up to 80%.
- Streamlined audit process, effectively preparing the financial team for upcoming audit engagements.

DMS+
by Auritas ™

DMS+ by Auritas

DMS+ is an advanced content management solution built to overcome the limitations of standard SAP BTP DMS and elevate it to enterprise-grade performance with AI-driven analysis, intelligent redaction, metadata management, cross-system synchronization, and more.

DMS+ by Auritas

- **Intelligent Document Access & Viewing:** Provides instant access to documents from any SAP business object with an AI-enhanced viewer for summaries, insights, and annotations.

- **AI-Powered Automation & Insights:** Uses AI to automate document processing, deliver contextual understanding, and power advanced semantic search and knowledge mining.

- **Metadata, Search & Operational Context:** Enriches documents with SAP operational data and synchronized metadata, enabling precise, contextual, user-initiated search from any screen.

- **Annotations, Notes & Collaboration:** Enables secure annotations, highlights, and notes directly within documents, governed by user roles and access permissions.

- **Security, Access Controls & Compliance:** Applies role-based visibility, field masking, and ILM-aligned records management to ensure compliant and controlled document access.

- **Centralized Repository & Storage Optimization:** Consolidates all documents into a unified global repository, eliminating module silos and addressing storage limitations across platforms.

Data Management Services

Our data management services offer a comprehensive solution for achieving digital transformation goals. By implementing a strategic approach to data management, we help organizations maximize their systems' native functionality, allowing them to accomplish more with fewer resources. Our effective data management practices have already saved companies over half a billion dollars.

Data Archiving & ILM

- Reduce SAP database size, retaining data access
- Fast-track & save costs for RISE with SAP adoption
- Design and implement SAP ILM, aligned archiving strategies
- Improve system performance and lower infrastructure costs

Retention Management

- Define retention rules based on legal & business requirements
- Automate data retention and deletion within SAP systems
- Reduce compliance risk with controlled data lifecycles
- Support audit readiness with traceable retention policies

Data Governance

- Establish clear data ownership, standards, and controls
- Improve data quality, consistency, and accountability
- Align gov frameworks with business & regulatory needs
- Enable trusted data for analytics, reporting & AI readiness

Legacy System Decommissioning

- Retire obsolete systems, preserving historical data access
- Address legacy applications after RISE adoption
- Reduce licensing, infrastructure, and maintenance costs
- Ensure secure, auditable access to decommissioned data

Data Migration

- Assess, cleanse, and prepare data for SAP transformations
- Execute SAP and non-SAP data migrations, minimal risk
- Support brownfield, greenfield, and hybrid approaches
- Ensure data accuracy, validation, and business continuity

SAP Data Compliance

- Align SAP data practices with regulatory requirements
- Implement controls for data privacy, retention, and access
- Support audits with transparent, traceable data processes
- Reduce compliance risk across active and archived data

Data Volume Mangement

Eliminate database inefficiencies with data volume management services designed to optimize storage, enhance system performance, and provide your organization with the tools needed to support long-term growth. DVM services help fast-track adoption and reduce costs during SAP RISE adoption.

From Overloaded to Optimized: Rightsize your Landscape

Through a comprehensive landscape assessment, Auritas data experts identify opportunities for **database archiving**, implementing strategies to maintain an ideal size long-term. We ensure your legacy data stays accessible and compliant, balancing efficiency and security seamlessly.

This is how customers are thriving with Data Volume Management:

- $4.4M in cumulative savings preparing for S/4HANA migration
- $5.5M in cumulative savings with archiving automation for SAP RISE
- Over 200 SAP & Non-SAP systems decommissioned
- 40% database size reduction with ongoing growth control
- 19% performance gains and 60% size reduction with data archiving

Real Results from Auritas Customers

Data Archiving

With data archiving, Auritas securely moves data that is no longer actively used in day-to-day operations from the primary database to a more cost-beneficial storage location, still ensuring retention compliance and easy accessibility to the archived data.

- Volume reduction & lower-cost hardware and licensing costs
- Increased system performance & faster processing times
- Reduce downtime for upcoming cloud migrations
- Support legal retention with SAP Information Lifecycle Management (ILM)

SAP DaRT

Auritas' extensive expertise in SAP DaRT helps simplify data retention and enhance audit compliance. We maximize the efficiency of your DaRT implementation, enabling secure extract, store, and access critical audit data without compromising system performance.

Audit Compliance with DaRT Implementations

- **Customize DaRT configurations:** Comply with legal and industry requirements

- **Enhance data security and integrity:** Secure storage methods for audit-readiness

- **Optimize system performance:** Separating audit data processes from live operations

Data Volume Assessment

A Data Volume Assessment (DVA) is a comprehensive analysis of an SAP database from a volume and size perspective. By examining data volume distribution and related volume management potential, this assessment aids in identifying size reduction opportunities, optimizing database performance, ensuring efficient resource allocation, and proactive capacity planning. Enterprises that executed on these findings, saw database reductions of up to 84%. **These reductions save our customers millions of dollars YoY.**

What does the assessment entail?

- Analysis of existing database tables.
- Identification of the largest tables in the database.
- Identification of potential archiving opportunities.
- Determine what can be deleted or archived and what cannot.
- Estimation of database size reduction.

What to Expect

- Report on existing enterprise data distribution.
- Knowledge of projected reduction in database size with archiving and deletion.
- Forecasted savings and database size reduction percentage.
- Recommendations on technical, functional, migration, and deletion objects.
- Readout of the results with Auritas' experts.
- ROI predictions with DB volume management recommendations.

Receive Your Results in One-Week!

1. Journey Starts
Complete the questionnaire and send the required documentation.

2. Assessment Execution
Data experts complete the database assessment.

3. Results Analysis
Auritas' SMEs review assessment and results for final report.

4. Assessment Readout
The analytical report will be ready for the presentation meeting.

Retention Management

The goal of retention management is to balance keeping data for operational, legal, and historical needs while minimizing the risks and costs of unnecessary data storage. It ensures data is retained only as long as required, in alignment with compliance standards, industry regulations, and organizational objectives.

Policy Framework
Define objectives, scope, responsibilities, and guidelines for how data is managed and retained.

Data Inventory & Classification
Catalog all data assets to assign appropriate retention periods and security controls.

Regulatory Compliance
Identify and adhere to applicable laws, regulations, and industry standards governing data retention.

Monitoring & Auditing
Continuously monitor retention activities and conduct audits to ensure policy compliance and reduce risk.

Data Handling Procedures
Establish standardized processes for collecting, storing, accessing, sharing, and disposing of data.

Data Disposal & Destruction
Securely dispose of or destroy data once it reaches the end of its retention period or is no longer required.
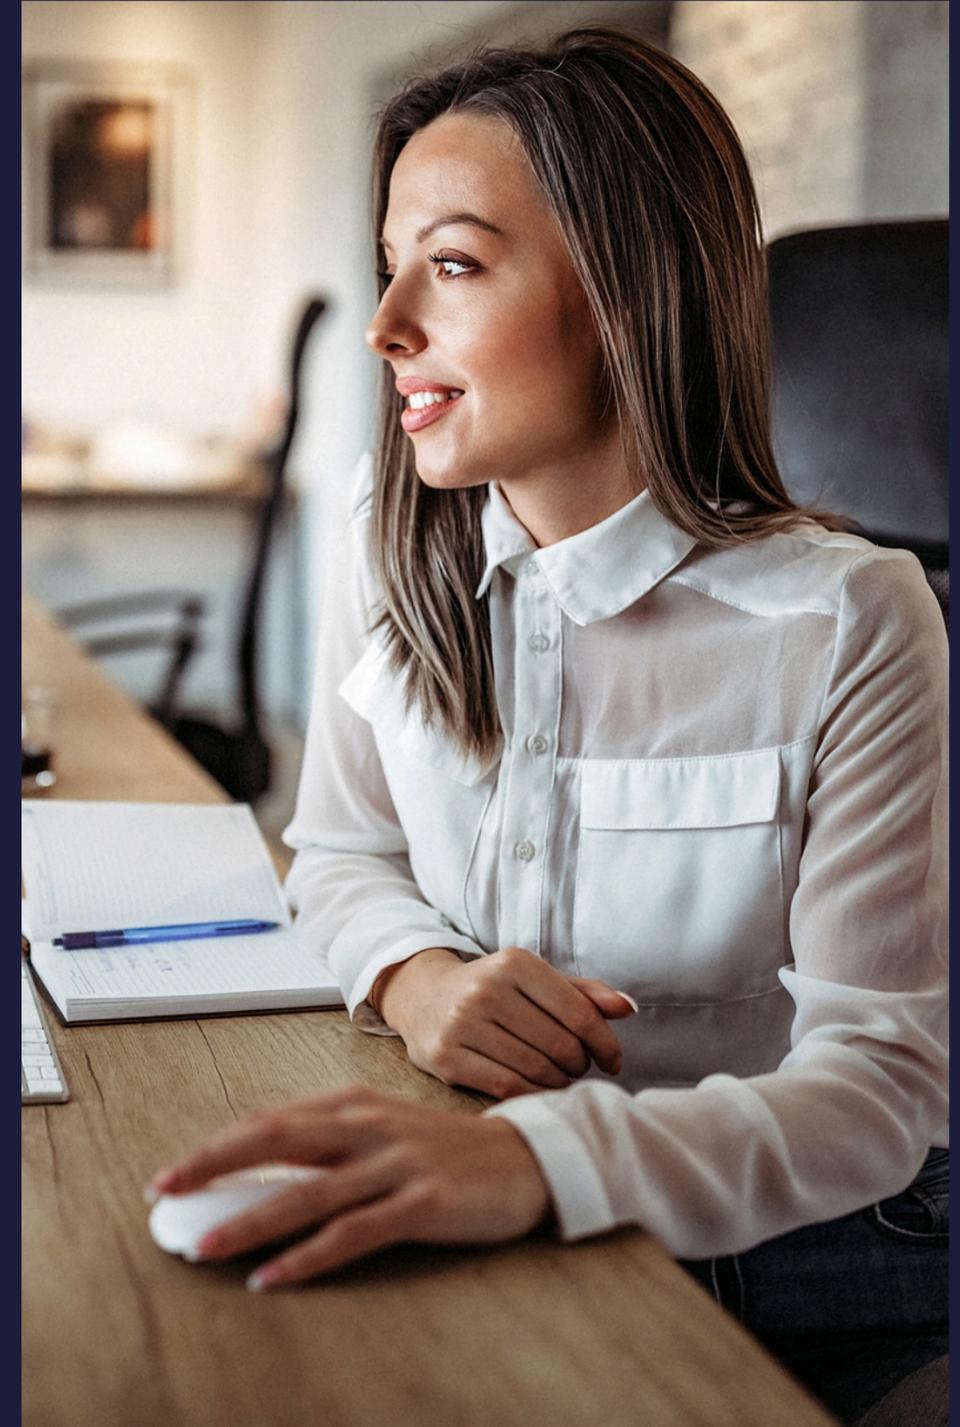

Legacy System Decommissioning

Auritas retires outdated or obsolete systems, software, or infrastructure for reduced costs and complexity, while ensuring access to legacy data and maintaining compliance standards with industry and regional regulations.

Shed outdated systems, foster innovation.

- Lower costs from licensing fees, infrastructure maintenance, and support team
- Ensured interoperability frameworks and integration with external systems
- Support compliance and retention management with Data GUARD
- Reduced carbon footprint and energy use for sustainability goals

For organizations looking to adopt SAP RISE, Auritas helps them address SAP and non-SAP legacy applications left behind to ensure compliance and accessibility to data and documents. From planning to execution, we help ensure a lean enterprise landscape.

Legacy decommissioning drives significant cost savings, empowering enterprises to reinvest in future-proofing initiatives and innovation.

Auritas

Data Governance

Auritas delivers end-to-end data governance services that help organizations establish control, consistency, and trust across their data landscape. We design and implement governance frameworks that define data ownership, standards, policies, and accountability, ensuring data is accurate, secure, and compliant.

By embedding governance into daily operations and integrating it with data management, archiving, retention, and compliance solutions, Auritas ensures governance is practical, scalable, and sustainablem supporting long-term business value, reduced risk, and confident decision-making.

Our team implements and configures governance tools that support data quality, metadata management, lineage, and access controls, integrating seamlessly with SAP and non-SAP solutions. We align governance initiatives with regulatory requirements, business objectives, and digital transformation goals, enabling reliable reporting, analytics, and AI readiness.

- Improves data quality, consistency, and trust across the organization
- Reduces compliance risk through clear ownership, policies, and controls
- Enables reliable analytics, reporting, and AI-driven decision-making

SAP MDG

SAP Master Data Governance is a comprehensive solution designed to manage and govern an organization's master data efficiently. It plays a pivotal role in maintaining data consistency, accuracy, and integrity across various systems and applications within an enterprise.

By cohesively integrating it in your data schema and multiple SAP and non-SAP systems, the Master Data Governance tool serves as a centralized hub for governance.

SimpleMDG

As organizations shift to the cloud with RISE with SAP and SAP S/4HANA, clean, consistent, and governed master data becomes mission-critical. Traditional MDG tools, often struggle to meet the needs of today's distributed, hybrid enterprise.

SimpleMDG changes that. Built on SAP BTP, its modern, cloud-native framework that unifies master data governance across SAP and non-SAP systems, accelerates deployments, and eliminates complexity through intuitive, no-code configuration.

Data Quality Assessment

The insights that a business can extract out of their data are only as good as the data itself. Businesses are only able to make good, informed decisions if their data is accurate, complete and overall good. **Better Data. Better Decisions**.

A Data Quality Assessment is a comprehensive analysis of a database's content, within any SAP and non-SAP environment. By examining quality, this assessment aids in proactive planning, identifying enhancements opportunities, optimizing performance, and ensuring accurate decision-making.

Assessment Use Case

With Auritas' Digital Data Quality Assessment, organizations gain valuable insights on their businesses. Data Doctors perform diagnostics of the health of your SAP Master & Transactional Data through a battery of **297 tests**.

- The assessment requires little engagement from corporate resources (2 hours per object from internal staff) and **takes 10 days to get complete results.**

- A **comprehensive report** comes as a result. It includes the current data health and the recommended remediation alternatives, both process and technology.

Assessment Results

- Learn about the of the data.
- Identify issues in the data.
- Analyze the quantum and impact of data quality issues.
- Recommendations on remediating the issues.

SAP S/4HANA
Depends of Clean Data

Most organizations manage the quality level of data to meet the needs of the system it resides in. The boardroom of the future requires transitional systems to ensure the data quality level supports not only business transactions, but also instant analysis of information.

Moving data quality into transitional systems will simplify your data management practices around data objectives, especially those that are paramount to your business, such as customers, employees and suppliers.

Start with a solid plan around loading only quality data (and content) into your newly deployed S/4HANA system. leverage this plan to define your ongoing data management rules for maintaining a high data quality level as additional data is created, updated, and ultimately, retired.

Data Migration Services

Auritas delivers secure, accurate, and efficient data migrations across SAP and non-SAP landscapes. Our structured approach includes data assessment, cleansing, transformation, validation, and reconciliation to ensure business continuity and data integrity throughout the migration process.

We **support complex migration** use cases, including mergers and acquisitions, migration to SAP S/4HANA, and system consolidations or cloud transformations. By combining deep SAP expertise with proven tools and methodologies, Auritas minimizes risk, reduces downtime, and ensures data is migration-ready, compliant, and optimized for future operations.

- Proven methodologies for complex migrations.
- Deep **expertise** in migrating data across SAP ECC, S/4HANA, and non-SAP systems
- Strong focus on data quality, validation, reconciliation, and more
- Experience supporting brownfield, greenfield, and hybrid migrations
- End-to-end ownership from data assessment and cleansing through post-migration support

Cloud Migration Services

Auritas helps organizations migrate from on-premise environments to the cloud with minimal disruption and maximum business value. Our approach includes landscape assessment, migration planning, system optimization, data readiness, execution, and post-migration support to ensure secure, scalable, and cost-efficient cloud operations.

We support key cloud migration use cases such as RISE with SAP, SAP S/4HANA Private or Public Cloud transitions, and data center exits or infrastructure modernization initiatives. By combining deep SAP expertise with proven migration frameworks, Auritas enables smooth transitions while optimizing performance, compliance, and long-term cloud readiness.

Auritas Cloud Migration Expertise
- Proven experience migrating SAP landscapes from on-premise to cloud
- Strong expertise supporting RISE with SAP journeys and SAP cloud deployment models
- Focus on optimization, data volume reduction, and cost control before and after migration
- Secure, compliant migration approaches aligned with regulatory requirements for data and documents
- End-to-end delivery from assessment and planning through post-go-live support and maintenance
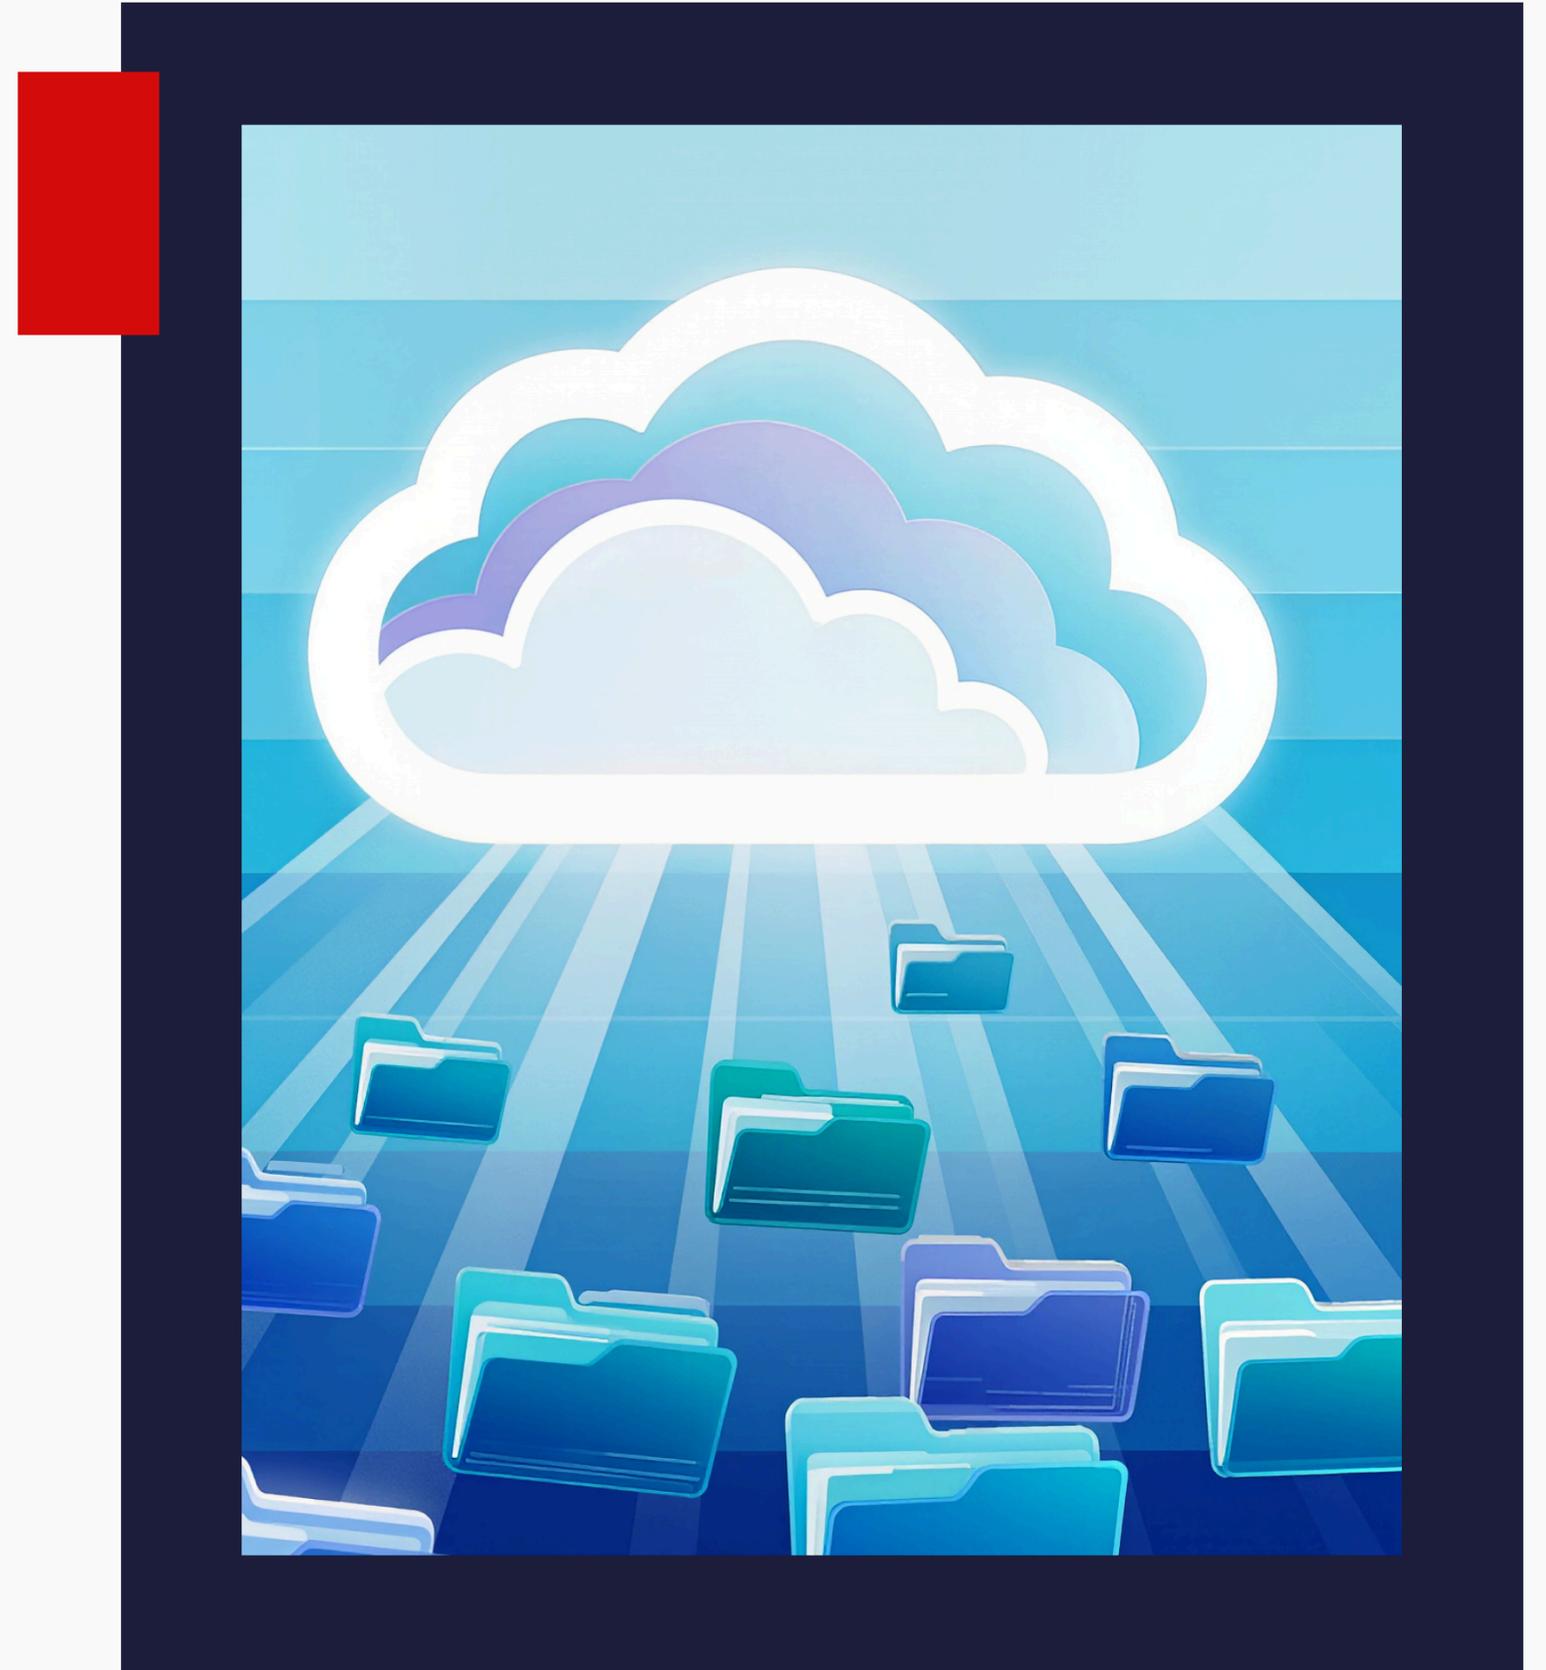

Preparing for S/4 RISE

AMPD

Auritas aligns with SAP to bring you best in class approach to system migration. Auritas AMPD Methodology ensures enterprises significantly reduce the risks and costs of migrating and operating on SAP S/4HANA.

Designed to be flexible, the AMPD process can be changed to fit your organization's unique needs and goals. From cost savings to NetZero downtime, preparing for your migration is the key to success.

1. **Archiving**

2. **Migration**

3. **Performance Testing**

4. **Decomissioning**

Get Value From Start to Finish

AMPD is the methodology used by top Fortune-500 companies when migrating to the cloud. From addressing data volume and compliance, to testing system performance and retiring legacy apps; Auritas experts ensure a successful S/4HANA migration.
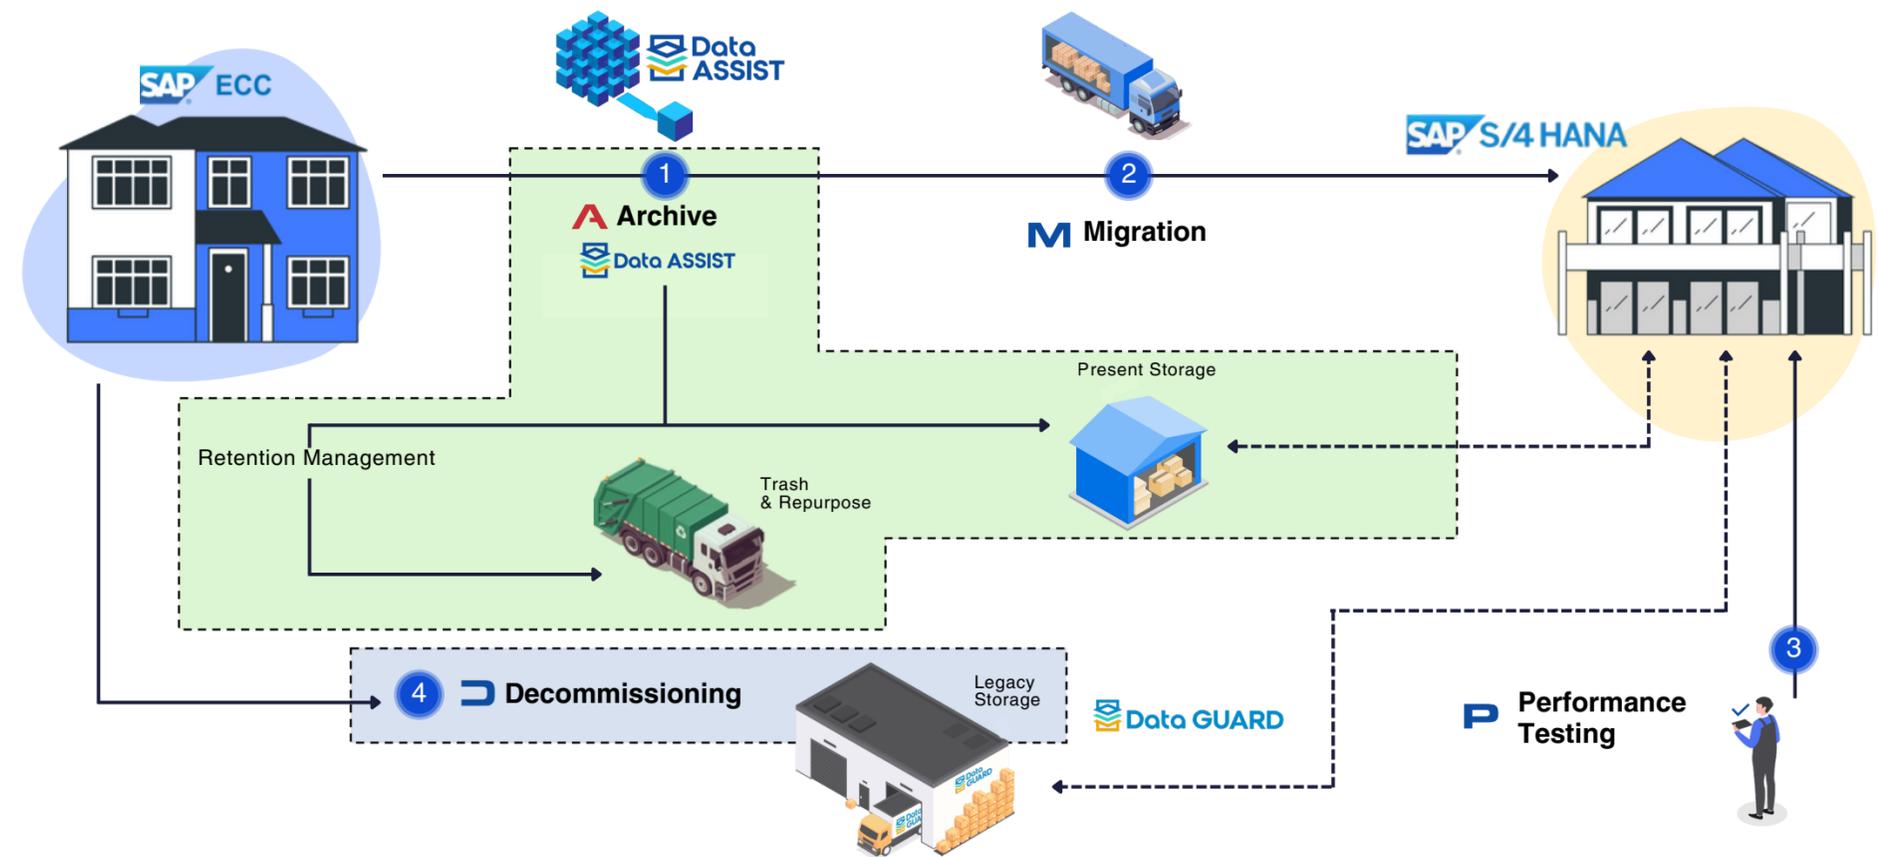

SAP S/4HANA
Implementation Services

From strategy to execution, our experts ensure a seamless S/4HANA deployment, specializing in tailored solutions for mid-market and large enterprise customers. Auritas' functional and technical S/4 experts bring the experience needed for a seamless transformation, ensuring you can fully leverage your new SAP S/4HANA system.

Key Elements of Your S/4 Implementation

Auritas aligns with SAP to bring you best in class approach to system migration. Our end-to-end approach focuses on optimizing business processes to drive innovation.

SAP Best Practices

SAP Best Practices' support main processes with pre-configured business scenarios & documentation.

Integration Suite

Leverage the BTP Integration Suite to interconnect business processes enhancing communication.

Process-Focused

Our predictable, reliable approach ensures a smooth, uneventful go-live, minimizing disruptions & maximizing efficiency.

Training & Workshops

Experienced consultants help prepare your team with comprehensive training and knowledge transfer.

The SAP Activate Methodology for S/4HANA Migration

Take advantage of SAP Best Practices and its pre-configured business scenarios and documentation. **Activate** provides a clear adoption process of structured and solution-specific best practices. When implemented with Auritas' **AMPD Methodology**, we ensure your entire transition process is flawless.

Prepare > **Explore** > **Realize** > **Deploy** > **Run**

Solution Implementation:

Our solution implementation services focus on helping you achieve your digital transformation goals through strategic process optimization. By utilizing our services, tailor-made scenarios, and known accelerators, we enable you to maximize the functionality of your IT investments. With our expertise in data optimization and process streamlining, we help you enhance operational efficiency, reduce costs, and improve customer satisfaction.

SAP Business Data Cloud (BDC)
- Automate high-volume SAP transactions and data updates
- Reduce manual effort with reliable batch processing
- Improve data accuracy through validation and controls

SAP Business Technology Platform (BTP)
- Build clean-core extensions and integrations on SAP BTP
- Connect SAP and non-SAP systems seamlessly
- Enable scalable innovation, automation, and analytics

OpenText™ Extended ECM
- Embed content directly into SAP business processes
- Centralize document management with SAP context
- Improve productivity, compliance, and document control

Vendor Invoice Management
- Automate invoice capture, validation, and approvals
- Accelerate AP processing and reduce errors
- Increase visibility and control across invoice workflows

Document Presentment
- Automate creation and delivery of outbound documents
- Support multiple channels with consistent formatting
- Reduce manual effort and distribution costs

SAP Vertex
- Automate tax determination within SAP transactions
- Support complex, global tax compliance requirements
- Reduce risk while improving tax accuracy

SAP Vistex
- Manage complex pricing, rebates, and incentives
- Automate claims, accruals, and settlements
- Improve visibility into revenue and profitability

SAP **Business Data Cloud** (BDC)

SAP Business Data Cloud (SAP BDC) is a centralized cloud solution designed to connect business data across multiple systems, enabling seamless integration, real-time analytics, and AI-powered decision-making. With connections to tools like Collibra and Databricks, SAP BDC ensures seamless data orchestration for streamlined enterprise landscapes.

Auritas

Unleashing Transformative Insights & Connectivity

Auritas leverages SAP BDC to unify, integrate, and optimize business data across SAP landscapes. We help implement and configure BDC solutions to centralize data, link it to relevant processes, and improve accessibility. Our services include seamless integration with SAP and non-SAP systems, automation of workflows, and optimization of data usage to enable faster decision-making, better insights, and more efficient operations.

Auritas ensures your business data is connected, accurate, and actionable for smarter decisions.

BW Modernization

Auritas helps enterprises modernize SAP BW environments by leveraging SAP BDC and its BW Private Cloud Edition (BW PCE). Our approach preserves a governed data backbone while enabling cloud integration, self-service analytics, and alignment with SAP's cloud-first strategy, without disruptive system rebuilds.
As organizations face growing data volumes, Auritas ensures BW modernization delivers an architecture ready for advanced analytics, automation, and AI, keeping SAP landscapes efficient and compliant.

- We help reduce BW footprints through data archiving & decommissioning
- Improve query performance and system efficiency
- Lower costs while supporting scalable, future-ready analytics

SAP **Business Technology Platform** (BTP)

SAP Business Technology Platform (BTP) is a cloud-based platform that enables integration, extension, and innovation across SAP and non-SAP systems.

Auritas helps organizations leverage SAP BTP to integrate, extend, and optimize their SAP landscapes. We design and implement custom applications, automate workflows, and seamlessly integrate with other systems. Our services enable real-time analytics, process innovation, and cloud-first strategies, helping businesses scale efficiently, maintain a clean core, and unlock actionable insights from their data.

SAP Integration Suite

Bring your SAP and non-SAP systems together with SAP Integration Suite. Unlock streamlined processes, real-time data flow, and operational agility across your enterprise.

With SAP PI/PO reaching the end of mainstream support in 2027, SAP Integration Suite comes as the successor, a more modern solution for enterprises. SAP Integration Suite is your key to connecting it all, cloud to on-prem, SAP to non-SAP, without friction, all within SAP BTP.

SAP Integration Suite is designed to facilitate seamless connectivity between diverse applications, systems, and data.

With Auritas, we help from deployment to post-live support, ensuring no more juggling disconnected systems.
How can Auritas help?
- Solution deployment on SAP BTP.
- Integration with multiple ERP solutions.
- Migration from legacy systems.

Content Management

Combine documents and company assets with business data and relationship to get the full value out of your unstructured data and harness the benefits of increased productivity, improved customer relationships, and business compliance.

We help embed content management directly into SAP business processes, with technical solutions like **OpenText Extended ECM (xECM)** and **IBM FileNet**, we eliminate the need for users to switch between different applications. This integration reduces manual effort, minimizes errors, and accelerates decision-making, thereby improving overall business process efficiency.

OpenText Extended ECM (xECM)

Auritas aligns with SAP and OpenText to bring you best in class xECM for SAP implementation with a holistic overview of your data and document management practices and end-to-end support for solution implementation and administration.

With over two decades of experience with OpenText xECM projects, managing both **structured data and unstructured content**, Auritas' experts bring strong technical & functional credentials.

IBM FileNet

Auritas delivers comprehensive IBM FileNet services to help organizations modernize, streamline, and secure their enterprise content management landscape.

From initial product **implementation** to system **enhancements** and ongoing **support**, we ensure your FileNet environment is optimized for performance and long-term sustainability.

Backed by decades of experience in content management and deep expertise across complex enterprise ecosystems, our team brings strong technical and functional capabilities to every FileNet engagement. Auritas helps organizations integrate **FileNet** with critical business systems, enhance automation, improve governance, and maximize the value of their unstructured content.

Auritas

OpenText Implementation & Optimization Services

As a certified OpenText Partner, Auritas provides customers with implementation, upgrades, and optimization services to help maximize the value of OpenText solutions. With deep expertise, Auritas empowers organizations to streamline operations, enhance information management, and realize greater returns on their technology investments. With a refined, results-driven implementation approach, we ensure a seamless transition and long-lasting business value.

SAP Vendor Invoice Management by OpenText
Automating AP processes for speed and accuracy with advanced invoicing technology.

SAP xECM by OpenText
Modernizing content management for collaboration and compliance. Including xECM for SuccessFactors

SAP Document Presentment by OpenText
Streamlining document generation for accuracy and efficiency with OpenText's Document Presentment solution.

OpenText Core Capture for SAP
Automated, intelligent content capture for SAP business processes with document context retention.

OpenText Extended ECM (xECM)

Auritas aligns with SAP and OpenText to bring you the best-in-class xECM for SAP implementation with a holistic overview of your data and document management practices and end-to-end support for solution implementation and administration.

With over two decades of experience with OpenText xECM projects, managing both **structured data and unstructured content**, Auritas' experts bring strong technical & functional credentials.

OpenText Extended ECM provides a unified platform for managing both structured and unstructured data, enhancing business processes, ensuring compliance, and fostering better collaboration across the organization. The tool integrates content services with core business applications, playing a pivotal role in increasing efficiency for SAP users.
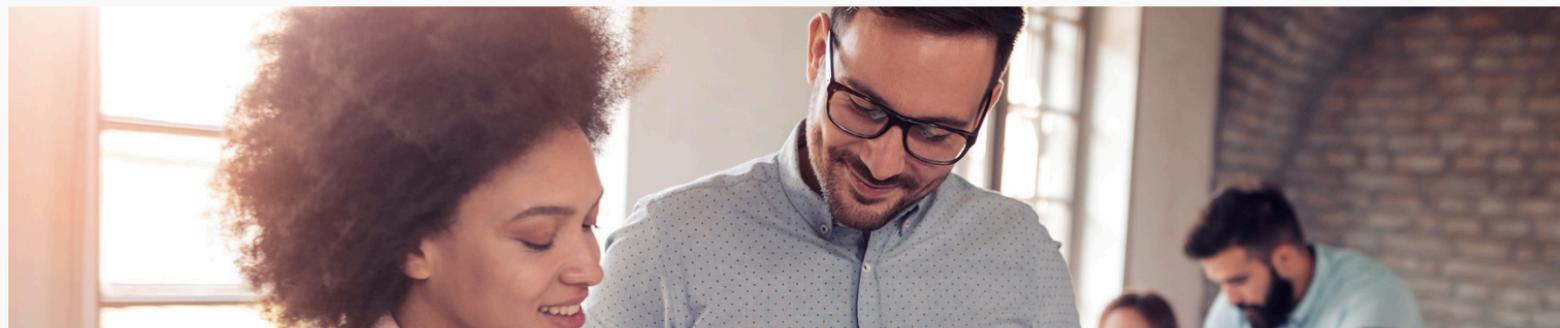

Content + Context = Value

Combine documents and company assets with business data and relationship to get the full value out of your unstructured data and harness the benefits of increased productivity, improved customer relationships, and business compliance.

Data Integration
Link unstructured content directly to SAP transactions and objects.

Ensured Compliance
Support regulatory compliance with records management and audit trails.

Cost Savings
Reduce operational costs through efficient document and process management.

Content Management
Enable document capture, access, archiving, and collaboration.

Auritas

Invoice Management (IM)

Auritas aligns with SAP and OpenText to bring best-in-class **SAP Invoice Management by OpenText** implementation. Our experts help optimize financial operations and bring value quickly and safely. With accelerators for invoice-to-pay automation, Auritas is your one-stop shop for SAP financial excellence. No other vendor in the market does what we do at this scale and in such a holistic view.

Our account receivables solutions focus on effectively managing cash flow and customer collections. It streamlines processes and systems for a cohesive financial lifecycle without bottlenecks and mitigates errors.

"Our OpenText VIM customers have seen remarkable success, from cycle time and transaction cost reduction, to improved relationships with suppliers and significant savings. We take operational efficiency to another level."
– *Mani Ramaswamy, Chief Technology Officer at Auritas*

AURITAS VIM CUSTOMERS

SeaWorld Parks & Entertainment   TORO   AIR PRODUCTS   NVIDIA

LOCKHEED MARTIN   GraybaR   ULTA BEAUTY

Auritas for IM Services

By choosing Auritas for your OpenText VIM needs, you benefit from a partner that combines technical expertise, industry experience, and a client-centric approach to deliver high-quality, efficient, and effective OpenText Vendor Invoice Management for SAP services.

Why Auritas for my OpenText VIM Implementation?

- **Expertise**: The team of certified professionals brings decades of deep knowledge in process optimization and implementation.

- **Experience**: Auritas has a strong track record and extensive experience in implementing OpenText VIM solutions.

- **Tailored Solutions**: Customized solutions that are tailored to meet the specific needs of each organization.

- **Proven Methodologies**: Auritas' structured approach helps minimize risks, reduce downtime, and ensure successful project outcomes.

- **End-to-End Services**: Solutions that cover the entire lifecycle of an OpenText VIM implementation.

OpenText Vendor Invoice Management
Health Check by Auritas

The Auritas **OpenText VIM Health Check** will culminate in a detailed report outlining recommendations designed to reduce manual labor, expedite processing cycles, lower transaction costs, and eliminate risks. We help you get more value from your VIM solution.,

Leveraging over thirty years of expertise, Auritas will develop a customized roadmap for system optimization and provide ongoing support to ensure long-term stability and efficiency of the solution.

Why Auritas for my OpenText VIM Check?

- We measure your solution against the best-in-class benchmarks and give you meaningful, practical solutions to get you there.
- Over three decades of experience with process optimizations and implementations.
- Hundreds of successful projects across all verticals.
- We've pre-built an approach that will help generate a report on the assessment, getting your results e recommendations quickly.

The objective of the assessment is to figure out the issue hindering your system and create a tailored roadmap for operational excellence. Once stabilized, our experts continue available for ongoing support.

Assess: Conduct health check on current OpenText Vendor Invoice Management in 7-business days.

Identify: Document issues with functionality and usage hindering your ability to harness the full potential of the tool.

Recommendations: Propose design adjustments for solution leading to issue remediation and enhancement opportunities.

Roadmap: Estimate cost and time to resolve issues and define a tailored implementation roadmap.

Document Presentment by OpenText

Document presentment refers to the generation, formatting, and distribution of business documents in various formats, tailored to meet specific recipient needs and preferences. It encompasses everything from invoices and purchase orders to statements and customer communications, as well as marketing materials.

Auritas implements and configures OpenText Document Presentment to automate the creation and delivery of business documents. We integrate the solution with enterprise content repositories, ensure compliance with regulatory and retention requirements, and provide ongoing management to support secure, reliable, and long-term success.

Multi-Channel Delivery
Deliver documents via email, fax, print, and web to meet diverse customer preferences.

Monitoring & Auditing
Continuously monitor retention activities and conduct audits to ensure policy compliance and reduce risk.

Automated Document Creation
Automate document creation and distribution directly from SAP, reducing manual effort and errors.

Data Disposal & Destruction
Securely dispose of or destroy data once it reaches the end of its retention period or is no longer required.
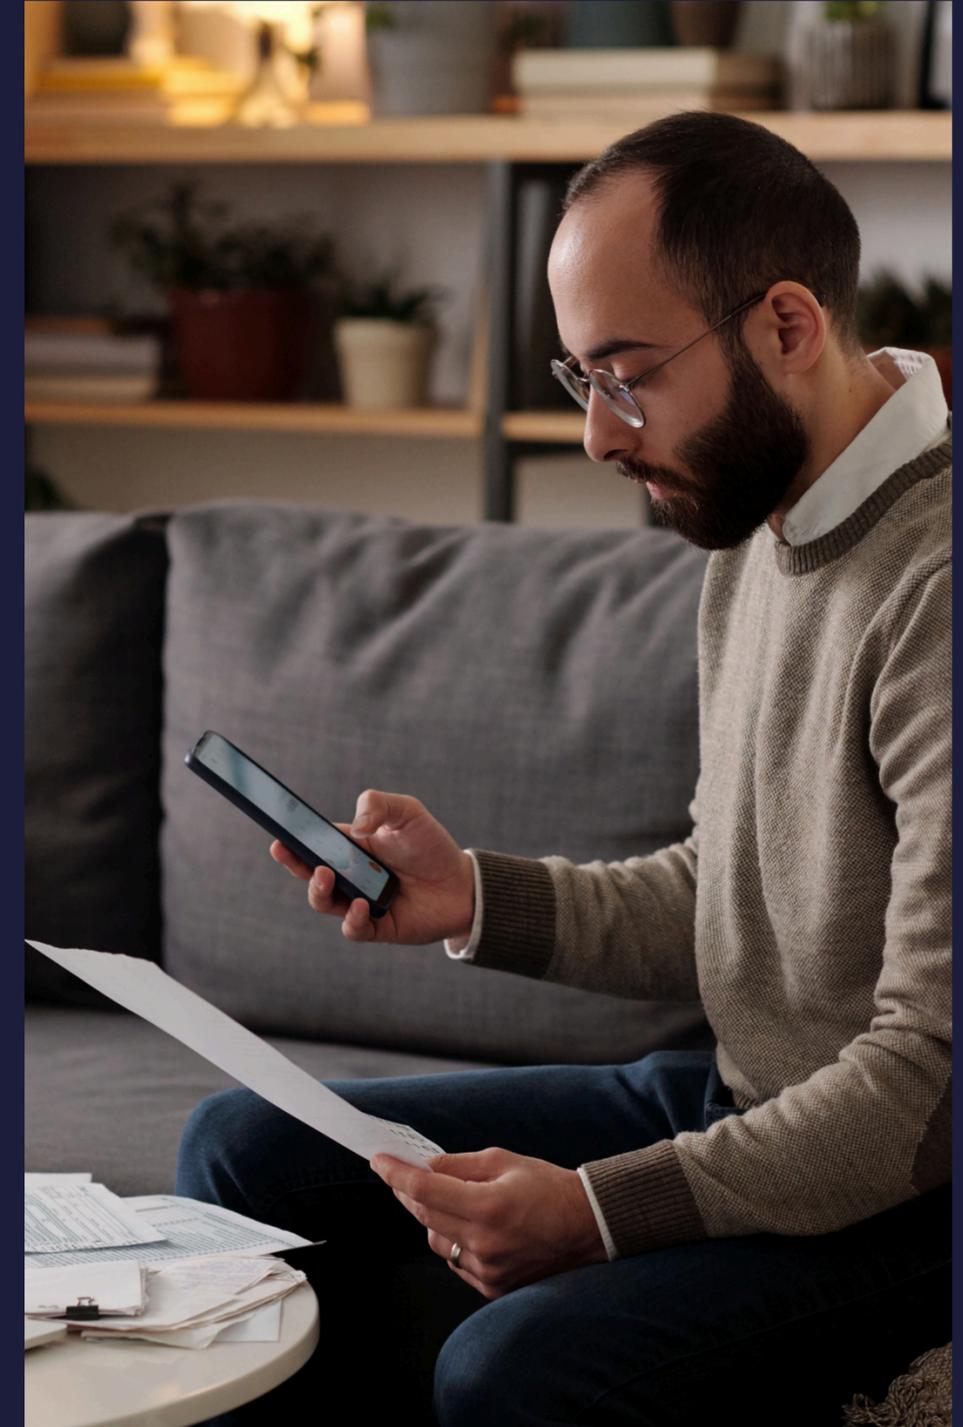

SAP Ariba: Business Network

SAP Ariba enhances sourcing and spend management by unifying all procurement activities on a single, cloud-based platform. It enables optimized collaboration across teams and suppliers, offering instant visibility into procurement operations and real-time insights through an intuitive, user-friendly interface.

From sourcing and contract lifecycle management to supplier onboarding and purchase order (PO) generation, every step of the process is digitized and streamlined.

All supplier interactions, including RFQs, catalogs, PO confirmations, and order changes, are managed digitally within the Ariba Network, creating a centralized, auditable, and transparent environment. This end-to-end visibility accelerates procurement cycles, minimizes errors, and ensures a single source of truth across the organization.

SAP Ariba also offers built-in compliance and risk controls, supports all spend types, including direct, indirect, and services, and enables global supplier discovery and rapid onboarding.

SAP Ariba: Supply Chain Financing

SAP Ariba supports optimized working capital management by enabling early payments for suppliers through buyer-initiated financing. This approach enhances supplier liquidity by leveraging the buyer's stronger credit profile to provide faster access to funds, often at lower financing costs.

As a result, suppliers benefit from reduced cost of capital, while buyers strengthen supplier relationships, improve supply chain resilience, and maintain more favorable payment terms without compromising cash flow.

These capabilities are fully integrated into the Ariba platform, allowing for automated financing workflows, real-time visibility into invoice status, and scalability across global supplier networks. With built-in controls and analytics, organizations can align working capital strategies with broader procurement and financial goals, creating a more agile and financially sustainable supply chain.

>Auritas

SAP Vertex

TAX & COMPLIANCE

Auritas is a Vertex partner and SAP Gold Partner. With holistic Vertex implementation and optimization services, we assist enterprises in streamlining the process of managing various types of taxes globally.

Vertex is a comprehensive tax compliance solution designed to simplify the process of managing taxes, including Sales & Use Tax, GST, and VAT. It provides organizations with a centralized and automated platform that accurately calculates taxes and maintains detailed reports for remitting the appropriate amount of tax to taxing authorities.

Why Auritas for my Vertex needs?

- **Expertise**: Extensive experience in both SAP and Vertex solutions, ensuring a smooth and efficient implementation process.
- **Comprehensive Offering**: Auritas provides a full range of Vertex services, from integration to deployment, training, and support.
- **Tailored Solutions**: Customized solutions to meet the specific needs and business processes of each enterprise.
- **End-to-End Services**: Auritas provides ongoing support and stays updated with the latest developments for continuous improvement.
- **Positive Track Record:** Auritas has a proven track record of successful SAP Vertex implementations.

Automated, Real-Time Tax Calculation
Automating tax calculations ensures accurate and timely tax determinations, reducing manual errors and delays.

Simplified Returns Filing
Simplified returns filing reduces the time and effort required for tax reporting.

Easy Maintenance & Scale
Easy maintenance and scalability allow businesses to adapt and grow without hassle.

Cost and Process Efficiencies
Enhanced cost and process efficiencies lead to significant savings and streamlined tax operations.

Master Data Monitoring
Robust master data monitoring maintains accurate and up-to-date tax-related information.

Global Tax Compliance
Compliance with global tax regulations helps businesses meet international tax requirements.

SAP Vistex

Auritas helps organizations across different industries manage the full revenue lifecycle using SAP Vistex. We implement end-to-end Vistex solutions that unify pricing, promotions, rebates, incentives, contracts, and customer loyalty programs into a single, scalable platform.

Our services automate planning, execution, settlement, analysis, and reporting, reducing complexity while improving efficiency, compliance, and partner relationships. By leveraging embedded analytics, Auritas enables smarter pricing and incentive decisions with full visibility into partner, customer, and supply chain performance, helping organizations transform revenue management and protect profitability.

With decades of expertise in integration with SAP, once the Vistex platform is live, we ensure information flows seamlessly with your ERP.

- Deep SAP Vistex expertise across complex pricing, rebates, incentives, and contract management.

- Proven end-to-end implementations integrated with SAP S/4HANA and ECC environments.

- Strong focus on analytics, compliance, and scalable revenue optimization services.
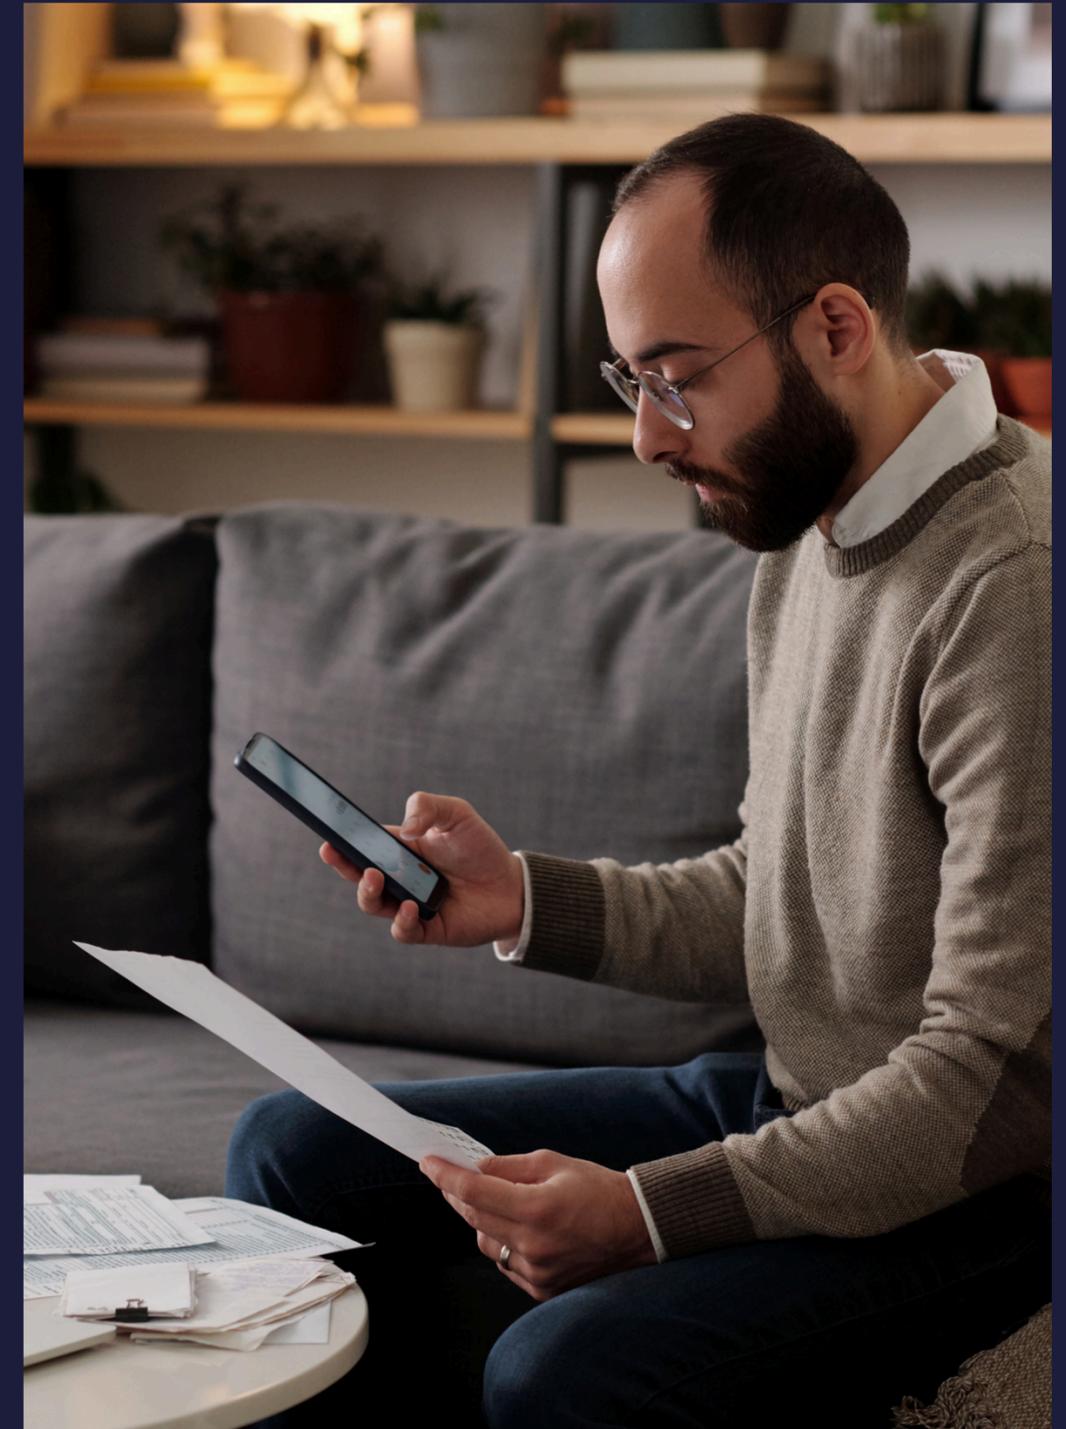

Geographic Information Systems (GIS)

Auritas GIS Services: Connecting Assets, Data, and Location

Auritas' methodologies ensure faster implementations, secure legacy systems and data migrations, and reduced risk, driving long-term scalability powered by accurate, real-time geospatial intelligence.

With proven SAP knowledge in asset management and distributed asset operations, Auritas handles deployments, migrations, and optimizations for leading GIS platforms like ESRI ArcGIS and GE Smallworld.

With decades of expertise and hundreds of successful SAP implementations and optimization projects, Auritas delivers **advanced GIS deployment and integration** for a unified, data-driven view of your assets. From deploying leading platforms like **ESRI ArcGIS and GE Smallworld** to seamlessly integrating them with SAP, we help organizations break down data silos, enhance decision-making, and maximize asset performance.

Deep expertise in GIS deployment for the utilities sector, combined with proven SAP knowledge in asset management and distributed asset operations, ensures seamless integration, optimized workflows, and better decision-making.

GIS Deployment
Auritas designs and implements GIS solutions tailored to your industry, ensuring your geospatial data is accurate, accessible, and ready to drive operational decisions.

SAP Integration
We connect GIS platforms like Esri ArcGIS directly with SAP S/4HANA and SAP Service & Asset Manager, creating a unified, location-aware view of assets and processes.

System Migration
Transition from your current GIS platform to Esri ArcGIS with Auritas. We ensure data integrity, minimize downtime, and deliver a smooth migration that empowers your organization.

Artificial Intelligence (AI)

Auritas helps enterprises enhance business processes and unlock new levels of automation through practical, scalable AI implementations. Using a phased approach, we create a tailored, evolving AI roadmap aligned to your organization's goals, data readiness, and SAP landscape.

We implement SAP Joule, SAP Business Data Cloud (BDC) AI, and other AI tools directly within SAP environments to automate workflows, improve decision-making, and surface intelligent insights. By integrating AI seamlessly into existing processes, Auritas ensures AI adoption is secure, governed, and delivers measurable business value.

In addition, Auritas has incorporated AI capabilities into its products, enabling enhanced analytics, optimized processes, and automated workflows.

Benefits of AI implementation with experienced experts:

- Faster, lower-risk AI adoption with a proven implementation approach
- Solutions aligned to real business goals, not experimental use cases
- Seamless integration of AI into existing SAP processes and data
- Improved automation, efficiency, and decision-making accuracy
- Strong data governance, security, and compliance built in from day one
- Scalable AI solutions that evolve with business and technology needs

We Architect & Implement AI Innovation.

AI Features in the Auritas Product Suite
Auritas' products have AI capabilities for enhances data analysis and recommendations, allow better view into your data and processes.

End-to-End AI Implementation Services
From assessing and building a use case, we help draft a roadmap and implement AI platform/model for optimized operations.

Investment in AI Research & Development
Auritas is investing in AI research, including building a skilled team of developers and researchers to design new solutions and optimize existing models.

Financial Excellence by Auritas

Accrual Automation

Auritas Intelligent Accrual automates the financial close process for inflight invoices in OpenText VIM. Reduce the duration of your accruals process by 80% while ensuring compliance.

Tax Automation

Holistic approach to Vertex solution implementation, providing indirect tax handling for the SAP ecosystem, simplifying complex tax processes globally.

Procure to Pay

Best-in-class approach to OpenText Vendor Invoice Management (VIM) integration for SAP, optimizing financial operations and bringing value to AP teams quickly.

Pricing & Contracting

Auritas' SAP Vistex solution implementation and services are designed to assist enterprises in streamlining their pricing and contracting processes.

Sourcing & Financing

Business Network

SAP Ariba implementation helps streamline sourcing and spend management with real-time insights and intuitive collaboration on a single cloud platform. From sourcing and contract lifecycle management to supplier onboarding and purchase order (PO) generation, every step of the process is digitized & streamlined.

Supply Chain Financing

Comprehensive implementation of SAP Ariba will help optimize working capital through early supplier payments, buyer-backed financing, and reduced supplier capital costs (SAP Taulia).

Auritas' Application Management Service

Our highly qualified experts leverage their decades of experience to deliver maximum value to your organization. By monitoring and providing qualitative preventive maintenance, and ensuring system health, we allow you to take full advantage of your investments, allowing your enterprise to do more with less. With AuriCare, you don't have to worry about it, we'll get you there.

Guidance & Technical Support

- Guidance on SW functionality for OpenText, Vistex, Vertex, SAP Archiving ILM.
- Incident Support, Trouble shooting, Bug-Fix, Break-Fix, Issue resolution & Work around.
- Execution of recurring operational tasks.
- Facilitate coordination & assist user in third party incident resolution.

System Performance & Health Advisory

- Proactive Monitoring of system resources (Memory, Storage, File Size etc.).
- Outage Management & High availability.
- Identify new archive objects for better performance & reduced storage.
- Monitor & Analyze applications for Low Performance issues.
- System Health check for covered applications.

System Upgrade Advisory

- Advisory on patches & S/W versions to be applied
- Advisory & Assistance in Upgrade Planning

System Administration & Regular Maintenance

- Apply the patches & regular system updates.
- User Management & Regular Admin activities.

On-Demand Packages

- Enhancement Package
- Records Management Advisory
- Outage Management & High Availability service

Why **Auritas**

With hundreds of successful projects completed across all industries, Auritas' proven track record illustrates our ability to deliver solutions of any size with agility and precision. We harness our market-leading technical expertise to offer a full suite of set-up services and products designed to help your vision become a thriving reality.

More than 25% of Fortune 1000 companies have trusted Auritas to solve their problems and guide them through their digital transformation journeys. With over two decades of experience under our belt, Auritas experts are ready to help organizations tie their business goals to digital initiatives.

We help enterprises tranform and maximize value.
