

Revolutionize SAP DMS with AI-enabled Intelligent Management

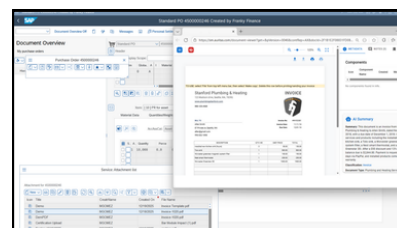

DMS+ by Auritas is an advanced content management solution built to overcome the limitations of standard SAP BTP DMS and elevate it to enterprise-grade performance with AI-driven analysis, intelligent redaction, metadata management, cross-system synchronization, and more.

Intelligent document management with AI-driven search, summaries, metadata enrichment, dynamic role-based redaction, and contextual insights.

Unified content access with enterprise-grade governance for documents across SAP modules and third-party systems, enforcing records management for audit readiness.

Store and access SAP Archive files via ArchiveLink/CMIS, while ensuring security with role-based document access.

No matter where you are in your SAP content management journey, DMS+ by Auritas expands and strengthens your content storage capabilities, helping you securely manage, access, and govern enterprise content while enabling greater automation, compliance, and AI-driven insights. Built by Auritas, DMS+ layers advanced AI onto SAP DMS to meet evolving enterprise content demands.

Security, Access & Compliance

Role-based access, field masking, and ILM-aligned records management ensure secure, compliant document control.

Annotations & Collaboration

Secure annotations, highlights, and notes within documents, governed by user roles and permissions.

Intelligent Document Access

Instant document access from SAP business objects with AI-powered viewing and insights.

AI Automation & Insights

AI-driven processing delivers contextual understanding, semantic search, and knowledge discovery.

Centralized Storage

A unified global repository eliminates module silos and addresses storage limitations across platforms.

Metadata & Contextual Search

SAP-enriched operational data and synchronized metadata enable precise, contextual search.
