

Data Volume Management for SAP Business Technology Platform

Data ASSIST by Auritas helps organizations efficiently optimize their SAP data volume management by automating the data archiving process. It simplifies the identification and archiving of redundant or non-essential data, reducing database size, lowering storage costs, and improving overall SAP efficiency. Data ASSIST by Auritas provides comprehensive analysis features for real-time insights into your data, while automating scheduling to ensure bankable cost savings. With an automated data archiving process, SAP users can control database growth and maintain a lean, efficient SAP environment, reducing storage costs and improving overall efficiency without manual work.

Visual Analysis and ROI Projections

Analyze your data using customizable visual charts and graphs and "what-if" analysis to identify which items to archive for optimal ROI.

Automate Scheduling, Eliminate Manual Errors

Eliminate the need for manual intervention, and avoid the risks associated with employee turnover, forgetfulness, or human error.

AP Volume Optimization Analysis

Get recommendations on sizing and volume management strategies for your SAP environment instantaneously.

Automated scheduling

Helps avoid human error leading to cost savings and accurate DB reporting.

Intuitive data insights

Quick understanding of the scope & impact of data management activities.

Automated scheduling

Helps avoid human error leading to cost savings and accurate DB reporting.

Data health monitoring

Real-time view into DB size reduction and performance improvements.

Improved communication

Visual reports allow sharing with stakeholders the value of archiving.

Customizable dashboards

Visual analysis dashboards focused on your key metrics and business needs.

About Auritas
