Data GUARD

System Decommission on SAP Business Technology Platform

> Auritas

Data GUARD by Auritas facilitate organizations to decommission legacy SAP and non-SAP systems while retaining accessibility to the data for regulatory, legal, and business purposes. Ensure reporting capability on data and documents retired and stored in Data GUARD. Decrease the total cost of ownership of your legacy hardware while maintaining access to and preserving necessary data.

Data GUARD by Auritas - Objectives & Functionalities

- **Single View:** Provides a single view for managing & retiring SAP and non-SAP legacy systems.
- **Reporting on Legacy Systems**: Build customized reports with the data, document, tables and all the information decommissioned.
- **Access Historical Data:** Run advanced tailored reports on decommissioned data and have a single source of truth.

- Provides a single view for managing & retiring multiple legacy systems within an enterprise.
- Data GUARD's capabilities for reporting on the data, documents, and tables stored in the tool allow for organizations to get access and insights into all the information decommissioned systems.
- Improved visibility & tracking of extraction, transformation, & loading processes. Maintain access & run advanced tailored reports for your decommissioned data.

Streamlined Retention Enforcement
Ensure compliance with evolving regulations and privacy laws. By centralizing data and implementing robust protection measures, organizations can minimize compliance risks and simplify auditing processes.

Improved Data Security & Protection
By retiring these legacy systems, Data GUARD allows organizations to eliminate potential entry points for cyber threats and reduce the risk of data breaches or unauthorized access.

Preserved Data Accessibility
The solution provides advanced search and reporting capabilities, facilitating the location and access to specific data sets or info. This enhanced accessibility streamlines workflows reduces data retrieval time and enhances cross-functional communication.

Reporting on Legacy Data
Data GUARD allows organizations to get reports and insights into all the information decommissioned. Users can customize reports, providing different layouts, views, and filters tailored to the organization's needs.

📊 Proven Success from Satisfied Customers

Decommissioned **200** legacy SAP and non-SAP applications.

Simplified network overall ecosystem with **centralized** data access.

Reduced storage footprint and increase speed of **access** to data.
