

System Decommission on SAP Business Technology Platform

Data GUARD by Auritas

Data GUARD by Auritas facilitate organizations to decommission legacy SAP and non-SAP systems while retaining accessibility to the data for regulatory, legal, and business purposes. Ensure reporting capability on data and documents retired and stored in Data GUARD. Decrease the total cost of ownership of your legacy hardware while maintaining access to and preserving necessary data.

Objectives

- **Single View:** Provides a single view for managing & retiring SAP and non-SAP legacy systems.
- **Reporting on Legacy Systems:** Build customized reports using the data, documents, tables, and all the information from decommissioned systems.
- **Access Historical Data:** Run advanced, tailored reports on decommissioned data and have a single source of truth.

Data GUARD by Auritas

- Provides a single view for managing & retiring multiple legacy SAP and non-SAP systems within an enterprise, creating a single source of truth.
- Data GUARD's capabilities for reporting on the data, documents, and tables stored in the tool allow for organizations to get access and insights into all the information decommissioned systems.
- Improved visibility & tracking of extraction, transformation, & loading processes.
- Maintain access & run advanced tailored reports for your decommissioned structured and unstructured data.

With simple cloud-based service from Auritas and SAP, you can move your data to cost-effective cloud storage locations where it remains easily accessible to SAP-BTP users while retaining the original context of transactions. Cloud storage is faster and easier to use, without requiring additional training.

Retain access to legacy data with one single source of truth.

As the talent pool for legacy technologies dries up, it becomes increasingly important to retire outdated systems. Data GUARD makes this process seamless and cost-effective, freeing up resources and allowing you to focus on driving innovation and growth.

This solution offers a single view for controlling and decommissioning multiple systems, making it simple to apply corporate retention policies and meet legal requirements as you retire your SAP and non-SAP systems efficiently & access the data securely.

Data GUARD helps you to stay compliant with data retention regulations and avoid potential fines or legal consequences.

This product not only enhances the financial viability of your organization through compliance enforcement, optimization of data storage and cost reduction, but it also promotes environmental sustainability by decreasing energy usage and minimizing the total carbon footprint of your IT investments.

Data GUARD is the ultimate solution for retiring legacy systems and optimizing your data management strategy in a way that benefits both your organization and the environment.

“Applying system decommissioning best practices **saved us hundreds of thousands** in hardware & mainframe licensing costs for devices we were no longer actively using.

- IT Project Manager, US Manufacturing Company

System Decommission on SAP Business Technology Platform

Streamlined Retention Enforcement

Data GUARD helps organizations ensure compliance with evolving regulations and privacy laws. By centralizing data and implementing robust protection measures, organizations can minimize compliance risks and simplify auditing processes.

Improved Data Security & Protection

By retiring these legacy systems, Data GUARD allows organizations to eliminate potential entry points for cyber threats and reduce the risk of data breaches or unauthorized access.

Preserved Data Accessibility

The solution provides advanced search and reporting capabilities, facilitating the location and access of specific data sets or info. This enhanced accessibility streamlines workflows, reduces data retrieval time, and enhances cross-functional communication.

Reporting on Legacy Data

Data GUARD allows organizations to get reports and insights into all the information decommissioned. Users can customize reports, providing different layouts, views, and filters tailored to the organization's needs.

About Auritas

Auritas is a global ERP products and services company specializing in ERP deployments, data management, process optimization, and product innovation. As an SAP Cloud Choice Flex Partner, the company has established itself as a leading pioneer in the rapid deployment of transformation engagements spanning the full suite of SAP solutions.

The company has successfully achieved over a billion in accumulated customer savings due to its expertise and experience in maximizing IT investments. With strong partnerships including SAP Gold and Cloud Choice Flex Partner, OpenText, Google Cloud Platform, AWS, Microsoft Azure, and Vertex, Auritas consistently delivers measurable ROI across leading industry verticals.
